ARCTIKO G 214®

ARCTIKO CONTROLLERS

The G214 Controller is used on most of our units and has been the main controller of Arctiko for many years. With regular updates, the G214 controller has stayed on top of the competition. The controller has all the features needed for the safe storage of your valuable samples.

The G214 is equipped with a 4,3” LCD display and a USB port for easy upload of software/download of logged data. The controller has extensive integrated logging capabilities with access to detailed logs directly on the display. It can monitor multiple alarm conditions, has an integrated memory for 30 years, and is available in multiple languages. We made sure to integrate a battery backup for alarms, logging and temperature display in case of a power cut. In case of probe failure, an autocycle is added on as a feature, combined with 3 levels of password protection.

4,3” LCD display

Multiple languages

Password protection

Main specification

4,3” LCD display	yes
USB port for easy upload of software/download of logged data	yes
Extensive integrated logging capabilities with access to detailed log directly on the display	yes
Monitoring of multiple alarm conditions	yes
Integrated memory for 30 years	yes
Available in multiple languages	yes
Battery backup for alarms, logging and temperature display in case of power cut	yes
Auto cycle in case of probe failure	yes
3 level of password protection	yes

Optional features

Prepared for connection of 2 additional probes	yes
Prepared for electronic lock with access via RFID card	yes
Prepared RS485 via Modbus	yes
Prepared for connection of GSM alarm module	yes

Alarm features

Visual and acoustic alarm	yes
Adjustable high/low temperature alarm	yes
Power failure alarm	yes
Probe failure alarm	yes
Instrument failure alarm	yes
Open door alarm	yes
Contact for remote alarm	yes
Shows all alarms	yes
