THE ARCTIKO VISION

ARCTIKO AIMS to be the first and best partner for delivering advanced and customized cooling and freezing solutions to the health care and life science segments globally.

FURTHERMORE, Arctiko is a flexible organization that is able to deliver high-quality, environmentally friendly, leading-edge and customized solutions.

CERTIFICATES

ISO 9001

ISO 9001 is the most widely used international standard in the world. It streamlines and documents Arctiko's working processes and ensures that our products always meets the expectations of our partners concerning high quality.

ISO 13485

ISO 13485 is a standard for the design and manufacture of medical equipment. It is an independent standard certification that is generally harmonized with ISO 9001. The standard has been prepared in accordance with the European Commission with a view to the essential requirements of EU directives for medical devices and CE marking.

For Arctiko, the ISO 13485 is a quality management system, ensuring that our products meet the EU directive 93/42/EEC for medical devices.

ETL CERTIFICATION

Arctiko's products for the US market are approved according to the following standards:

- UL 471 issued: 2010/11/24 Ed.: 10 Rev: 2014/11/17 Commercial Refrigerators and Freezers
- CSA C22.2#120 Issued: 2013/03/01 Ed: 4 Refrigeration Equipment

MEDICAL DEVICES DIRECTIVE

Arctiko offers selected products which are approved according to the EU directive 93/42/EEC for medical devices and CE marked as Class II equipment.

C E 2460

CE CERTIFICATION

Arctiko's product ranges are CE marked stating that our products meet all legal requirements concerning essential health and machinery safety.

FDA REGISTRATION

Arctiko International is FDA registered pursuant to Title 21, 807 et seq. of the United States Code of Federal Regulations.

EXPLANATION OF ICONS

SINGLE COMPRESSOR SYSTEM

The single compressor system consists of one compressor and one cooling cycle. This technology has a unique and simple structure that ensures easy maintenance, less heat dissipation, low energy

consumption and noise reduction. Arctiko manufactures a unique range, offering the best solution in the ultra-low temperature market with the single compressor system.

TRUE DUAL™ TECHNOLOGY

With the independent TRUE DUALTM technology, your samples are protected with double security. The TRUE DUALTM technology consists of two independent cooling systems that work together. In the

event of a failure on one of the cooling systems, the freezer will maintain the temperature of at least -70°C, meaning your valuable samples always will be stored with the best possible security.

NOISE REDUCTION TECHNOLOGY

Thanks to our newly developed noise reduction technology, we are able to reduce the noise level drastically. This technology helps provide a pleasant

work environment. The noise reduction is achieved by the implementation of our uniquely designed enclosure of the compressor compartment.

VACUUM INSULATED PANELS

Arctiko's vacuum insulated panels are of a high-efficient quality that secures the lowest possible energy consumption. The panels are specially developed to optimize the freezer space and to increase the efficiency and cooling performance.

AIRFLOW CONTROL

Airflow control is a special new construction, which enables controlled airflow around the vital components of the

cooling system, securing maximum levels of performance and the lowest possible energy consumption.

FILTERLESS CONSTRUCTION

Filterless construction prevents complications due to dust in the filter. Dust blocks the air flow through the condenser, which reduces the unit's ability to dissipate heat effectively. The air that bypasses the clogged air filter carries dirt into the condenser, which increases the energy used in the compressor and generates additional heat for the ambient environment.

DIRECT COOLING

Direct cooling features evaporator coils in each shelf to cool each compartment directly for maximum uniformity and minimal recovery time, essentially giving you multiple small ULT freezers in one cabinet.

FORCED AIR COOLING

Arctiko's forced air cooling provides superior temperature uniformity and stability. Forcing the airflow around the shelves and stored items ensure that all parts of the unit are equally cold and avoids any cold or hot spots. Distributed by a powerful fan and open air flow areas along the sides, the air is always distributed evenly throughout the fully loaded unit.

ATEX/SPARK FREE UNIT

When handling or storing flammable items in a standard biomedical refrigerator or freezer, there will be a possible ignition risk. Therefore, we at Arctiko recommend storing your flammable items in an Arctiko

ATEX approved biomedical refrigerator or freezer. The Arctiko ATEX biomedical refrigerators and freezers are approved according to EN 60079-15 category 3, zone 2, CE EX 11-/3G.

MEDICAL DEVICE CLASS IIA

Depending on the purpose of the medical device and the items that will be stored inside, the classification will cover various risk products, e.g., blood.

Arctiko products are certified according to EU directive 93/42/EEC for medical devices and possess CE marking for Class II equipment.

CONTROLLER DESCRIPTION

The customer is always in mind when we are developing new products and technologies. We always strive to focus on user-friendliness, which is reflected in our controllers. Our controllers come with a wide range of features and offer optional solutions tailored to the customer's needs.

G214 CONTROLLER

The G214 controller is used on most of our units. It has been Arctiko's main controller for many years. With regular updates, the G214 controller has stayed ahead of the competition. The controller has all the features needed for safe storage of your valuable samples.

MAIN FEATURES ON THE G214 CONTROLLER

- 4.3" LCD display
- USB port for easy upload of software & download of logged data
- Extensive integrated logging capabilities with access to log directly on the display
- Monitoring of multiple alarm conditions
- Integrated memory for up to 20 years of logged data
- Multiple languages available in controller
- Battery backup for alarms, logging and temperature monitoring in case of power failure
- Auto cycle in case of probe failure
- 3 levels of password protection

OPTIONAL FEATURES * Upon Request

PREPARED FOR:

- Connection of 2 additional probes
- Modbus over RS485
- Connection of GSM alarm module

ALARM FEATURES

- Visual and acoustic alarm
- Adjustable high/low temperature alarm
- · Power failure alarm
- Probe failure alarm
- Open door alarm
- Contact for remote alarm
- Shows all alarms

V700 / V500 CONTROLLER

With the new Arctiko controller, you will get the most user-friendly controller on the market. The new controller comes as a 7" or 5" touch screen display. The controller is upgraded with the newest technologies on the market and has all the features needed for safe storage of your valuable samples.

MAIN FEATURES ON THE V700/V500 CONTROLLER

- Large 7" / 5" resistive touch screen display makes it easy to access all the
- Self-diagnostic test
- Display can be operated with gloves
- Display is easy to clean no accidental button presses
- USB port for easy upload of software & download of logged data
- Extensive integrated logging capabilities with access to detailed log directly on the display
- Monitoring of power and multiple alarm conditions
 Integrated memory for 20 years of logged data
- Multiple languages available in controller
- Battery backup for alarms, logging and temperature monitoring in case of
- · Advanced service mode
- 3 levels of password protection

OPTIONAL FEATURES * Upon Request

PREPARED FOR:

- · Connection of one additional probe
- Electronic lock with access via RFID card
- Built-in CO₂ backup function
- Modbus over RS485
- Connection of GSM alarm module

ALARM FEATURES

- Adjustable high/low temperature alarm
- Probe failure alarm
- Open door alarm

EXCELLENT COOLING PERFORMANCE

WITH SINGLE COMPRESSOR SYSTEM

Storing samples at ultra-low temperatures is always a highly sensitive process because the stored items most likely are of high value. Arctiko's single compressor system offers one of the best solutions in the ultra-low temperature market. We strive to design products that are easy to use and equipped with all the necessary features.

With our single compressor cooling system, which only uses one compressor and one cooling cycle, Arctiko has been able to manufacture a unique range of ultra-low temperature freezers with a reliable and exceptional stable temperature inside. Our true and original single-stage technology system has a unique and simple structure which impacts on less maintenance, less heat dissipation, low energy consumption and noise reduction.

Arctiko's single compressor system consists of fewer parts and has a simplified structure of the cooling system and electrical circuit, which reduces the failure rate. The compressor compartment located in the top of our upright freezers, provides many great advantages, such as easy access for service and maintenance as well as an ergonomically correct design, allowing easy access to each compartment inside.

Direct cooling with evaporator coils built into the shelves - for greater temperature uniformity. Simple and safe + Single compressor cooling system with only the essential parts.

ADVANTAGES OF ARCTIKO'S SINGLE COMPRESSOR SYSTEM

- Direct cooling in each chamber for greater temperature accuracy
- Low temperature difference from top to bottom
- Two single compressor systems used in our popular **TRUE DUAL**[™] technology double security
- Easy maintenance simple cooling system
- Low noise level
- Less heat generation
- Reduced maintenance of compressor compartment due to filterless construction

WHAT'S YOUR BACK-UP PLAN.

IF YOUR FREEZER FAILS?

Do not risk the safety of your samples due to the potential of a freezer breakdown. With Arctiko's TRUE DUALTM technology, you avoid problems and headaches caused by an unexpected breakdown on your freezer. You should use the time to focus on what is most important: your valuable samples - not worrying about the laboratory equipment. Do not ignore the huge risk of losing many years of valuable research because of poor laboratory equipment.

Arctiko's TRUE DUAL™ technology differs significantly from the conventional cascade refrigeration system in terms of fundamental design and operation. The TRUE DUAL™ technology consists of two independent cooling cycles. In the unlikely event of an unexpected failure or breakdown on one of the cycles, the other system will serve as a backup, guaranteeing that your samples will be protected and kept at least at -70°C. The TRUE DUAL™ technology together with the direct cooling ensures that Arctiko's Ultra-Low temperature freezers are known for their reliability and exceptional uniformity.

It is important to invest in the correct quality of laboratory equipment that meets the established regulatory standards. Arctiko's quality products will reduce the frequency of costly downtime situations, so that you can focus on the most important: your research

TRUE DUAL™ TECHNOLOGY

The TRUE DUAL™ technology consists of two independent cooling cycles. In the unlikely event of an unexpected failure or breakdown on one of the cycles, the other system will serve as backup, guaranteeing that your samples will be protected and kept at least at -70°C.

- Double security for samples
- · No stress and problems involved
- No costly downtime situations
- Faster recovery after openings
- No need for backup freezer
- Longer lifespanFast pull down time
- Direct cooling on shelves
- Great temperature uniformity

CASCADE SYSTEMS

In a cascade system, the two compressors depend on each other to reach -80°C. In case of failure on one compressor, the temperature will rise and potentially destroy the samples. Samples should be moved into a backup freezer to be safe.

- No extra security
- Need of backup freezer when the system breaks down
- Extra frustrations
- No direct cooling on each shelf
- Can be costly in the long run

CRYOGENIC & ULT FREEZERS

ENVIRONMENTALLY FRIENDLY AND ECONOMIC ALTERNATIVE

Arctiko is proud of the innovative cryogenic freezer for long-term preservation of cells, tissues and other scientific samples. In recent years, storage in mechanical cryogenic freezers has replaced cryogenic storage in LN $_2$ to avoid cross-contamination and to provide a more environmentally friendly, safe and cost-efficient alternative. A cryogenic freezer eliminates the continuous cost of LN $_2$ storage maintenance and avoids hazardous operating conditions.

The CRYO freezers are designed for a wide variety of applications, such as research and long-term storage applications for low-temperature scientific experiments, preservation of cells, DNA, bone material, bacteria and similar samples.

SUPERIOR COOLING PRECISION

The -150°C cryogenic freezers are among the most energy efficient compared with similar products. At less than 34 kWh/24h, no other -150°C product can come close to such a low energy consumption. The extremely low total ownership cost will with no doubt have a noticeable impact on the running costs.

Due to Arctiko's independent TRUE DUAL™ technology, security has never been better. In the unlikely event that one cooling system should fail, the second cooling system will maintain the freezer at a minimum of -130°C. The highly reliable cooling technology results in superior cooling precision and uniformity, even with multiple door openings.

GO WITH
TRUE DUAL™
COOLING
TECHNOLOGY FOR
EXTRA SECURITY

BENEFITS

ARCTIK® CRY®

- Designed for long-term cryogenic presevation
- Safer and more convenient than LN₂ Cryotanks
- Arctiko's TRUE DUAL™ technology keeps the samples safe at all times
- Low energy consumption, less than 34 kWh/24h
- \bullet Security never been better with the optional ${\rm LN_2}$ backup system the samples are protected against power failures and unexpected problems
- \bullet Dramatically improved temperature uniformity compared to LN_2 cryotanks
- ullet Eliminates the need for supply of ${\rm LN_2}$ and all the associated stress
- Reduces cost of ownership compared with the LN₂ cryotanks
- Avoid potential cross-contaminations due to improper storage of samples

Smart and easy handle with built in lock for restricted access

Maximum storage capacity with up to 14.400 samples in Arctiko 10x10 50 mm boxes

Reaches -150 °C in less than 6 hours!

ULT DEVELOPED FOR THE MOST CRITICAL USERS

▶ Our newest line is developed for the most critical users of a wide range of applications. The Integraline includes four upright cabinet models with a capacity from 381L to 815L and three compact space saving models from 7L to 88L. They include features like noise reduction technology, vacuum isolated panels and our trusted and safe **TRUE DUAL™** technology (upright models).

APPLICATION

Ultra-low temperature freezers have a wide application range for both biological and biotech storage. Whether you are in the medical field, life sciences, plastics, food or electronic components industry, these freezers are perfect for your application's needs. The Integraline is specially designed for long-term storage.

The Integraline models are perfect for storing such samples as DNA/RNA, plant samples, insect artifacts, autopsy materials, blood, plasma, bones and tissues, chemicals and antibiotics, tissue, bone marrow, cord blood, specimens, stem cells and sperm.

► MAXIMUM SAFETY

When you choose an Arctiko product, you receive more than what you might require in terms of security, logging and alarm features. We care about your valuable samples.

In addition to all safety features, the new V700/V500 ARCTIKO controller offers an integrated data logger with memory for 20 years, different interfaces and several alarms to ensure that your requirements for documentation and safety regulations are fulfilled.

Energy consumption has a huge impact on the cost of ownership: therefore, Arctiko's newly developed

models that can operate in ECO mode and NORMAL mode.

ECO mode is developed to reduce energy consumption while maintaining optimum uniformity for the stored materials.

VACUUM INSULATED PANELS

The compact space-saving cabinet design offers a reduced footprint due to the use of Arctiko's specially developed vacuum insulated panels, which ensure maximum interior volume and the Integraline models comes with one of the market's best storage per m2 ratios.

VIP panels combined with Arctiko's state-of-the-art single compressor and **TRUE DUAL™** technology provides a safe and high-quality ULT freezer. This model is ideal for the demanding standards that need a precise and uniform temperature environment.

EASY CLEANING AND MAINTENANCE

The interiors of our freezers are made of robust stainless steel for high sample safety and easy cleaning. The inner doors are detachable ensuring easy cleaning and defrosting.

► RELIABLE AND HIGHLY EFFICIENT TECHNOLOGY FOR ENHANCED SECURITY

No other manufacturer comes close to the performance of the Arctiko upright Integraline with the independent **TRUE DUAL**TM technology providing the utmost security within ULT freezers worldwide. Not only is the pull-down time less than three hours, but extra security measures have been incorporated.

In the event of any failure with one of the cooling cycles, the other system will still maintain the temperature at a minimum of -70 °C. This means that your samples will not be affected by any challenges caused by an unexpected failure until service is provided.

▶ OPTIMIZED CABINET DESIGN

The Integraline has a specially designed cabinet that provides high-volume sample storage. It is suitable for most racks and storage solutions and also works with more rack systems and storage containers than offered by other brands.

In addition, the design includes solid door gaskets for greater isolation and minimum heat loss.

The Model is designed with easily accessible compartments with four removable inner doors that are individually insulated and with magnetic catch. This ensures better stability and less heat dissipation, which results in lowering the cost of ownership. This smart function also ensures easy defrosting and maintenance of the unit.

ULT DEVELOPED TO TARGET THE MOST CRITICAL USERS

▶ Your valuable samples demands a safe and stable environment leaving no room for temperature fluctuations. Some samples are quite fragile and expensive, so you clearly can't allow unreliable equipment where frequent door openings can completely damage your samples.

The Integraline GG range is characterized by the short pull down time indicating an exceptionally dominant and productive refrigeration system with robust insulation and the potent mixture of polyurethane and vacuum insulated panels. Even with continuous door openings, it rapidly restores temperature uniformity creating a highly reliable environment that's not being affected by ambient temperature.

Therefore, it is essentially defined by amazing temperature recovery properties. The slower hold over time shows the mighty and well-insulated freezer's capability of keeping the temperature constant and the capacity of immediately restoring temperature uniformity following door openings. The range includes four upright cabinet models with an inner capacity from 385L to 819L.

STORAGE OF SENSITIVE SAMPLES

When storing sensitive samples, the stable temperature inside is essential. Some customers need to monitor the temperature through external devices in line with higher requirements. In our Integraline GG, we have included a premade access port for an easier installation of an external probe or monitoring device. Moreover, the new Integraline GG can be connected to several optional accessories, to get exactly the unit that fulfills the needs in the laboratory, so that you can focus on your valuable research.

APPLICATION

Ultra low-temperature freezers have a wide application range for both biological and biotech storage. Whether you are in the medical field, life sciences, plastics, food, or electronic components industry, these freezers are absolutely perfect for your application's needs. The application in the Integraline GG includes biological samples such as DNA/RNA, plant samples, insect artifacts, autopsy materials, blood, plasma, bones and tissues, chemicals and antibiotics, tissue, bone marrow, cord blood, specimens, stem cells, and sperm.

NATURAL REFRIGERANT

▶ We have strongly committed ourselves to the responsible use of natural resources and clean technologies by using eco-friendly alternatives. Our natural refrigerants include extremely low GWP (Global Warming Potential) values and ODP (Zero Ozone Depletion Potential).

Our tried and tested environmentally friendly CFC-free and HCFC-free refrigerants guarantee potent and powerful system securing your valuable samples, but without compromising our Earth's safety in the process. These refrigerants don't produce harmful fumes and they are considered to be the ultimate

solution to the environmental contamination produced by synthetic refrigerants.

Even though they are environmentally friendly, they consume significantly less energy without compromising the cooling system, environment, and making it cost effective as well. Our environmentally-safe refrigerants share strong thermodynamic properties creating high performance along the way.

The new Integraline is developed to target the most critical users on the market. The Integraline features our independent **TRUE DUAL**TM cooling system that consists of two independent systems offering you the best security.

In case of an unexpected failure on one of the independent cooling systems, the other will maintain the freezer temperature of at least -70°C. Thereby, your samples will not be affected by any challenge caused by an unexpected system failure, until service is provided. This is possible due to our highly reliable independent **TRUE DUAL**TM technology.

COMPACT AND SPACE-SAVING UNDERCOUNTER MODELS

BENEFITS

- Outstanding cooling performance with the true and original single cooling system.
- Compact space saving design makes the undercounter ULT's the perfect storage solution for laboratories with limited space.
- Single Compressor technology with a simple structure ensures easy maintenance, lower heat dissipation, low energy consumption and noise reduction for a pleasant work environment.
- Direct cooling for optimized temperature stability and uniformity, even with multiple door openings.
- Heated door frame prevents ice from building up around the gasket securing a stable and uniform temperature inside the freezer.
- Low energy consumption made possible with ECO mode and ultra-efficient Vacuum Insulated Panels.
- Built-in CO₂ backup controller system for extra security for your valuable samples.
- Self-diagnostic function to ensure that your alarm system is always working correctly.

DIRECT

ULT UPRIGHT FREEZERS

Our ULUF upright freezers feature our single compressor system with direct cooling for higher temperature uniformity and excellent temperature stability. The ULUF -86°C series is the optimal solution for any long-term storage application.

By placing the compressor and other heat and noise generating components on the top of the unit, the heat is distributed upwards and backwards, preventing the heat from warming up the entire room. This design also means that there is never a compartment, in which it would be difficult to locate your samples nor using fully. This all works to ensure an ergonomically correct unit that is easy and pleasant to use.

ULT COMPACT FREEZERS

The ULUF undercounter compact models will add a new dimension to your laboratory. The compact space-saving design and low noise level make it a perfect storage solution for your laboratory.

The ULUF -86°C series is produced with true and original single compressor technology, which secures outstanding cooling performance with only one compressor.

BENEFITS

- Compact space saving design makes the undercounter ULT's the perfect storage solution for laboratories with limited space.
- Single Compressor Technology with a simple structure that ensures easy maintenance, lower heat dissipation, low energy consumption and noise reduction for a pleasant work environment.
- Direct cooling for optimized temperature stability and uniformity, even with multiple door openings.
- Heated door frame preventing ice from building up around the gasket securing a stable and uniform temperature inside the freezer.
- Perfect for a laboratory or workstation where you want to work uninterrupted without going back and forth to your storage area.

ULT CHEST FREEZERS

The ULTF range shows that high performance freezing with focus on low energy consumption is the future. The range features our G214 Arctiko controller, which ensures that all alarm and data logging features are included as standard. The ULTF range is produced with true and original single compressor technology, which ensures great temperature stability for the safety of your samples.

The chest freezer will store your samples under optimal conditions even when opening the freezer several times throughout the day. The single compressor technology provides reliable low-temperature freezing and maximum temperature uniformity.

LOW-TEMPERATURE CHEST FREEZERS

The LTF (-60°C) and LTFE (-45°C) ranges ensure reliable low-temperature freezing and high temperature uniformity. Standard features include digital display, alarms, contact for remote alarm and castors.

The chest freezer will store your samples unde optimal conditions even when opening the freezer several times throughout the day.

BENEFITS

- Single compressor technology with a simple structure that ensures easy maintenance and has low energy consumption.
- Filterless construction prevents dust from blocking the airflow and minimizes maintenance procedures.
- With the single compressor system, less heat is generated in the work environment, which results in a lower cost of ownership.
- Low heat dissipation ensures a pleasant work environment.
- A Low noise level provides a better work environment.

BIOMEDICAL STORAGE SOLUTIONS

BIOMEDICAL STORAGE SOLUTIONS WITH HIGH RELIABILITY

Arctiko biomedical freezers and refrigerators store and secure your samples with outstanding cooling reliability and performance. Arctiko has combined the highest quality cooling performance created by forced air cooling with the many features and user-friendliness offered by the Arctiko controller G214. The results meet the more stringent requirements for lower power consumption, more precise cooling uniformity, the need for temperature and alarm surveillance, documentation and validation, making Arctiko's Biomedical range the number one solution for biomedical storage.

The Arctiko Biomedical range provides ideal solutions for the research industry and healthcare sector for storing vaccines, diagnostic samples, reagents and samples such as enzymes for genetic research, culture media and temperature testing of electrical components and precision devices.

In several countries, health ministries instruct pharmaceutical companies/pharmacies to document all pharmaceutical drugs that have been stored under a certain temperature. The advantage of choosing an Arctiko product is a controller with all needed features. In particular, the data logger with memory and on-screen graphs are extremely important features needed by pharmacies.

The Arctiko Biomedical range offers a wide variety of solutions from our 55 liter undercounter models up to 1381 liters of effective capacity. Each freezer/ refrigerator is pre-programmed from the factory to provide controller settings and cooling parameters for optimal, user-friendly solutions.

All products in Arctiko's biomedical range have a flexible interior so that we can meet all requirements for storage solutions! You can choose from a variety of shelf and drawer options or devise your own combination.

- Lower power consumptionPrecise and stable cooling

SPARK FREE INTERIOR

FLAMMABLE LIQUIDS WILL BE STOREI SAFELY WITH AN ARCTIKO ATEX APPROV REFRIGERATOR OR FREEZER

▶ When handling or storing flammable samples in a standard biomedical refrigerator or freezer, there will be a possible ignition risk. Therefore, we at Arctiko recommend storing your flammable samples in an Arctiko ATEX approved biomedical refrigerator or freezer.

The Arctiko ATEX biomedical refrigerators and freezers are approved according to EN 60079-15 category 3, zone 2, CE EX 11-/3G. This means that the inside of the unit is approved to store flammable, explosive or otherwise volatile substances.

Stored substances should always be kept in airtight containers, this to prevent the vapor or particles of the substances from escaping their container and ignition of non spark free items.

AVAILABLE IN ATEX

ATEX APPROVAL IS AVAILABLE AS AN OPTION ON:

true cooling specialists

Door lock

Forced air cooling

LED light

BENEFITS

- Easily adjustable shelves to accommodate any storage need you might have.
- Forced air cooling for high-temperature stability and quick temperature recovery after door openings.
- Door lock on all models for optimal security of your samples.
- Interior LED light offers a good overview of your samples.
- Anti-freeze thermostat

BIOMEDICAL BASIC LINE

This range offers high-temperature stability and quick temperature recovery after door openings as well as low noise level. It is suitable for laboratories due to the flexible storage and the unique monoblock technology which ensures the samples to be stored safely. It is user-friendly with adjustable shelves and comes with the necessary alarms.

+1/+10 °C -10/-25 °C

BENEFITS

- With the monoblock technology, the defrost process has less affect on the temperature inside the unit compared to units without monoblock, ensuring the integrity of the stored samples.
- Increased insulation ensuring low energy consumption
- Door lock on all models for optimal security of your samples.
- The 700 models feature our new unique pressed side panels offering an integrated shelf guide system for high hygiene and easy cleaning.
- Forced air cooling for high-temperature stability and quick temperature recovery after door openings.

Smart space saving combi model with freezer and refrigerator combined in one cabinet

BIOMEDICAL REFRIGERATORS

The biomedical refrigerator range includes the PR and LR range, with models from 94 L to 1381 L capacity. The LR range is equipped with solid door and the PR range with glass door, which allows a better overview of the stored items. The biomedical range stores and secures your samples with outstanding cooling reliability and performance.

Arctiko has combined the high-quality cooling performance created by forced air cooling with the features and user-friendliness offered by the Arctiko G214 controller.

BLOOD BANK REFRIGERATORS CE CERTIFIED

MEDICAL DEVICE CERTIFIED BLOOD BANK REFRIGERATOR

Blood Bank refrigerators are devices intended for safe storage of whole blood and blood components at temperatures ranging from +2°C to +6°C.

Blood must be stored at a consistent and stable temperature for the best results. The well-designed Arctiko Blood Bank refrigerators are the optimal choice. The features include uniform fan cooling that circulates the air around the stored blood. Polyurethane (CFC-free) insulation in cabinet walls, together with double pane glass doors, reduce the effect of the ambient environment and and promote temperature uniformity in the cabinets. Glass door and open drawer design ensures easy access to and identification of blood, which reduces the time required for door openings and results in better temperature uniformity.

Cold storage of blood is crucial in light of continuing advancements in medical science. The value of blood and blood components, coupled with stringent storage requirements, make the Arctiko Blood Bank refrigerators a major asset in risk management.

The importance of correct blood storage cannot be questioned today, with the medical industry investing millions of euros each year in laboratory procedures involving blood donation, testing, matching, preparation and so on. Many of the current medical practices around the world would not be possible without blood.

Every collection, identification and transfusion of blood must follow a protocol, so that blood transfusion remains safe for patients, donors and medical technicians. If blood is not stored properly, all of these efforts and expenses could be lost, which is why choosing Arctiko blood bank refrigerators is so important. Blood storage requires specially designed equipment to meet international standards, which is important to have in mind when purchasing your next blood bank refrigerator.

In conclusion, you can see it is very important to store blood in the correct manner, both for the health of the community and also to avoid wasting precious resources of life.

BLOOD BANK REFRIGERATORS

Continuous documentation of temperature conditions inside of cabinet together with the G214 & Dixell controller for optimum security. The valuable blood is well protected and monitored at all times.

STAINLESS STEEL DRAWERS

Arctiko Blood Bank refrigerators are specially designed to store whole blood bags in our easy extractable stainless steel drawers.

DOUBLE PANE GLASS DOOR

Our double pane glass door reduces heat from the ambient affecting the cabinet and promotes temperature uniformity in the chamber.

G214 CONTROLLER

The Arctiko controller with state-of-the-art electronics to maintain temperature uniformity and stability. The features include backup battery, power failure alarms, high/low-temperature alarms, probe failure alarm, instrument failure alarm, contact for remote alarm, integrated data logger with memory for 30+ years, RS 485/232 interface and USB readout/download.

STORAGE CAPACITY

Large storage capacity with a wide product portfolio with internal capacity from 94 L to 1381 L, meeting every customer need. Blood bag capacity from 72 to 960 pcs.

Features on Pages ▶ 76-77

WHAT'S YOUR BACK-UP PLAN, IF YOUR BLOOD BANK REFRIGERATOR FAILS?

Blood is an important resource and the safety of it should not be put at risk. Avoid the problems and headaches caused by an unexpected breakdown of your Blood Bank refrigerator and spend your time on what's more important, your research and treatment of humans.

Arctiko has added additional security in the form of a TRUE DUAL $^{\text{TM}}$ technology to the BBR-D range, so that the temperature will be maintained even in the event of an unexpected failure.

BENEFITS ON BBR/BBR-D RANGE

- Medical device approved
- TRUE DUAL™ technology (-D range)
- 3-level protection (Dixel, G214 and temperature chart recorder)
- Automatic door closing and door lock
- Forced air cooling
- Telescopic drawers
- Right hand hinged reversible door
- Stainless steel interior
- White exterior

OPTIMUM SAFETY WHEN STORING BLOOD

TRUE DUALTM technology with two separate and independent cooling systems in combination with the advanced Arctiko controller, provides extreme security where needed. All important controller features, such as a data logger and alarms, are included as standard.

If one of the independent cooling cycles unexpectedly fails, the other system maintains a stable temperature of $+4^{\circ}\text{C}$ and the blood will stay protected.

It is important to invest in the correct quality equipment also to meet the established regulatory standards. Arctiko's quality equipment will reduce the frequency of costly downtime situations.

Maintains stable temperature of +4 C and protects the blood

BLOOD BANK REFRIGERATORS

Our Blood Bank refrigerators are the best choice for safe storage of blood due to their exceptional temperature uniformity and reliable technology. The double pane glass door offers an optimal overview of the interior and with the telescopic drawers, the blood bags are easily accessible.

The valuable blood is well protected and monitored in our Blood Bank refrigerators, ensuring the high quality of your blood bags at all times. The BBR models come with an advanced controller, an integrated non-manipulative data logger with USB read-out and a chart recorder as standard.

ACCESSORIES | SHELVES RACKS | BOXES | VIALS

ACCESSORIES

CO, / LN, BACKUP

A number of Arctiko products can be supplemented by a CO_2/LN_2 backup system for optimized safety. The backup system is supplied with a heavy-duty internal battery, injection indicator and digital display with alarm functions. It injects CO_2/LN_2 in the event that the temperature inside a freezer rises above a preset temperature value.

TEMPERATURE CHART RECORDER

A chart recorder is a safe solution for documenting temperature conditions over a certain period of time. A replaceable pen continuously documents the temperature on a chart that circulates on either a 7- day or 24-hour basis. The chart recorder can be built in as an option in many Arctiko products.

GSM ALARM MODULE

The module sends a text message to one or several coded telephone numbers in the event of any accuring alarms. A simple, effective and reliable alternative that provides increased safety. The GSM alarm can be connected to a group of freezers if needed.

CRYO GLOVES

Our water resistant CRYO gloves protect your hands and prevent frostbite while you are handling frozen products in ultra cold environments down to -160°C. The gloves have multiple layers of insulation from fingertip to mid-forearm; they can also be used in very high temperatures up to +123°C. Available in different models and sizes.

VOLTAGE STABILIZERS

The voltage stabilizer will ensure that your equipment will receive normal, stabilized power. If the voltage rises or drops, the voltage stabilizer will stabilize the output to ensure the voltage reaching your equipment remains constant at 230 V (+/- 6 %) or 115 V (+/-6 %), within the operating range of the unit. Stabilized power is essential for refrigeration equipment in unsteady power areas to ensure long operation without damage and to ensure that the contents of the refrigeration unit are kept at the optimal temperature.

VOLTAGE CONVERTERS

Voltage converters can be used worldwide to transform 220 V into 110 V and vice versa. The voltage converters are made of highly durable materials and feature power source indicators and toroidal transformer. Models are available from 2400 W to 8000 W. Please contact Arctiko for more information and help in choosing the correct converter for your product.

DATALOGGER

The datalogger is a simple and safe electronic device that will record the internal temperature of the equipment over time with an external or internal sensor. The data logger is able to automatically collect data on a 24-hour basis in an automatically generated multi-level PDF report. It can easily be adjusted to the desired alarm limits and is available in various models with a range from -200 °C to +200 °C. Fully compliant with ISO standard 19005-1 Document Management industry guidelines for the long-term preservation of electronic documents (PDF/A) and FDA 21 CFR Part 11.

STACKING KIT

The stacking kit offers great advantages and minimizes the footprint, which ensures maximum floor space, if space is limited. The stacking kit makes it possible to combine undercounter refrigerators and freezers as desired. It is simple, easy to install and made of highly durable steel.

SHELVES & DRAWERS

PERFORATED STAINLESS STEEL SHELVES

Our perforated stainless steel shelves ensure stable storage due to their flat surface.

WIRE SHELVES STAINLESS STEEL

The stainless steel wire shelves are made of high-quality stainless steel, which ensures a long life span.

WIRE SHELVES PLASTIC COATED

The plastic coated wire shelves are standard equipment in our biomedical refrigerators and freezers and made of steel coated with durable plastic.

DRAWER SYSTEM

The Arctiko multi-purpose drawer system offers a great way to keep your samples in order. Either to divide up the freezer for several users or just for easy access and a good overview.

WIRE BASKETS FOR CHEST FREEZERS

Our wire baskets, which are available in two models, offer a great overview of your stored items.

STAINLESS STEEL DRAWERS

Our stainless steel drawers can be mounted in the majority of our products. Each drawer has fixed lanes and adjustable plexiglass dividers.

STAINLESS STEEL RACKS

DON'T WASTE TIME SEARCHING THROUGH UNSORTED SAMPLES

Store your freezer storage boxes in organized freezer racks. Arctiko offers a large variety of stainless steel racks to optimize your freezer space. These racks are made of high-quality, strong and long-lasting stainless steel. The racks make it easy to organize the samples inside the freezer. Our range consists of racks for both chest freezers and upright freezers.

CHEST FRONT RACK - CFR

The chest front rack is designed for optimal organization of chest freezers. The box is introduced from the front, thus ensuring a good overview. The handle at the top meanwhile ensures easy handling of the racks.

UPRIGHT SIDE RACK - USR

The upright side rack model features individual compartments for each box, meaning that the box is introduced from the side. On the front of the rack a vertical folding handle ensures easy extraction of the rack. The rack is smart in the event you need to access more samples at the time.

UPRIGHT DRAWER RACK - UDR

When using racks with drawers, only the relevant drawer with the freezer boxes of interest is pulled out. All other boxes stay safely in the cold interior of the ULT freezer. The drawers slide smoothly and easily, which facilitates easy introduction. The UDR rack is equipped with a smart grip, which ensures easy handling and location of necessary samples.

CRYOVIALS & BOXES

ARCTIKO BOXES

With Arctiko's cryoboxes, samples will be kept safe due to high focus on quality and many years of experience in handling strong, easy-to-use storage boxes with customers in mind.

Arctiko boxes come in two different versions: 9x9 separation and 10x10 separation, providing a storage capacity of 81 and 100 samples respectively. With the 10x10 box, the focus is to optimize the sample storage and provide more advantages when using conventional 9x9 boxes. Arctiko Cryo Boxes are available in 5 different heights: 32mm, 40mm, 50mm, 80mm and 90 mm.

- 23% increase in storage capacity compared to conventional boxes
- A click lock in the lid ensures secure handling and that samples will be stored optimally at all times
- Cryoboxes come with numerical codes for quick identification
- Standard measurements 130 x 130mm fits most rack systems
- The bottom construction enables one-handed opening of Arctiko vials without removing the vials from the box

ARCTIKO SLIM CRYOVIALS

Arctiko Slim Cryovials are uniquely designed for safe short- and long-term Combined with our popular and innovative 10x10 cryoboxes, the capacity will be optimized by more than 23%. Arctiko Slim Cryovials are available in 5 different sizes: 0.5ml, 1.0ml, 2.0ml, 4.0ml and 5.0ml

- Slim design with external thread invented for 10x10 boxes
- External thread limits sample contamination due to tight closing
- Highly resistant and withstanding temperatures of -196°C / 121°C
- Star-foot grip for easy and safe removal and fitting of the lid
- Self-standing star foot with anti-rotating bottom, compatible with various working stations
- Smart and uniquely designed lid allowing easy tightening and removal of the lid with only half a rotation
- Certified RNase-free, DNase-free, Pyrogen-free and DNA-free
- Sterilized according ISO 11137-2:2013

true cooling specialists

ARCTIKO US Inc, based out of Nashville, TN, is a subsidiary to ARCTIKO International.

All our UL/ETL approved ULT freezers are designed, developed, and engineered in Denmark. Moreover, we have two distribution hubs in USA, New York, NY and Nashville, TN.

In North America, we offer 4 different productranges covering temperatures from -30 °C to -86 °C. We have a truly unique product line of compact -86 °C undercounter freezers in different sizes unparalleled on the global market.

Our distribution hubs in Nashville and New York are stocked with our full product portfolio. The high inventory level makes sure we can deliver all our products fast and secure. Together with our outstanding nationwide transportation and logistics partners, we make sure that the end user receives their ULT freezer as quickly as possible.

With our nationwide service network, you and your clients can rest assured that we always have a service hub nearby for fast response time to any service call.

We are acknowledged across the world for our exceptional high-quality of Ultra-Low Temperature Freezers. We believe, that at a passionate approach to every project - paired with high team spirit amongst our competent employees of true cooling experts - enables us to make a significant difference for all our customers.

SERVICE & SUPPORT

Our service team has more than 40 years of experience and knowledge in cooling technology and controls. We are able to answer any kind of inquiries you may have regarding:

- ▶ Spare parts ordering/delivering/pricing
- ▶ Product maintenance and servicing
- ▶ Technical and after sales support
- ▶ User and service manual
- ▶ Service training sessions for dealers
